THE PROFESSIONAL WAY

Prestige™ Vinyl Patio Doors

All Prestige Patio Doors include our **Comfortech Glazing Systems!**

are tested against the most stringent industry standards for air and water infiltration, wind-load resistance, ease of operation, forced entry and much more. This means you'll have lower heating and air-conditioning costs, easier cleaning, low maintenance and increased comfort.

Standard Features

Strong, multi-chamber profiles and 5½" frame depth offer greater thermal efficiency and increased sound abatement.

Galvanized steel reinforced panels ensure rigidity and stable operation.

The vent lock adds peace of mind when you want to leave the door open for ventilation yet keep would-be intruders out.

Patented sliding system features four adjustable 1" wheels per operating panel to ensure smooth, easy and quiet operation.

Sill is reinforced with galvanized steel. Pair that with our patented water draining system, and it results in an efficient and durable base for our patio door.

Fixed and mobile panel rails meet and interlock perfectly, making removal from the outside virtually impossible. Lower sill design provides safer entry and exit.

Suspended by ball bearing rollers this top-hung heavy duty aluminum screen frame reduces binding, creating effortless operation.

Spring-loaded latch system automatically engages upon closing. Latch also includes interior locking feature. Fiberglass screen is standard. Heavy-duty fiberglass or aluminum screen is optional.

8000 Series Features

- Comfortech™ TLK triple glazed warm edge glazing system with high performance Low-E Krypton glass
- Woodgrain interior
- Secondary ventilation lock
- Multi-point locking Bright Brass or Satin Nickel handleset with keylock
